

For Immediate Release

9th Street NE and 15th Street NE Construction

Beginning Monday morning, June 16, 2014, the City of East Wenatchee will begin construction on 9th St NE and 15th St NE.

The prime contractor is Central Washington Asphalt. The project will involve reconstructing all sidewalk intersection ramps to the Americans With Disabilities Act (ADA) standard, grinding pavement and repaving of the street. Modifications to the center median on 9th St NE will also be made to accommodate the left turn lane in front of City Hall. A flashing school zone beacon will be installed on 15th St NE.

The public can expect single lane closures for the duration of the project. Traffic will be controlled with flaggers. The public is encouraged to use alternative routes during construction.

The project is expected to be completed in early August.

For additional information, please contact the East Wenatchee Public Works Department at 884-1829.
